Consultant's first deliverables

For each launch state, map the administering agency and local delivery partner; verify the current federal award, fiscal year, authority, state allocation, remaining period, subaward window, eligible applicant, allowable costs and match; classify CRF as direct applicant, subrecipient, contractor, research partner or non-eligible party; and identify the actual solicitation or procurement route.

Important eligibility boundary: Federal/state grants, clinical reimbursement and service contracts are distinct routes. Medicare/Medicaid do not automatically pay for performances, kits, academy access or subscriptions. Covered services require eligible patients, qualified enrolled providers, authorization, documentation and applicable billing rules. Future appropriations and NOAH awards are not secured.
